OVERVIEW OF THE CHALLENGE

- ❖ A challenge, 'Submit Solutions to combat COVID-19' was launched on the Startup India Portal. The challenge aims at scouting innovative technologies and solutions for precautionary as well as treatment-related interventions.
- ❖ The solutions were invited under 10 broad categories namely Personnel protective equipment, Testing Equipment, Critical- care equipment, Large area sanitization and sterilization, AI-based technology for contactless entry, Movement tracking, Geofencing, Crowd management, Fake news detection, and Logistics.
- ❖ The solutions received were evaluated by COVID-19 comprising of Biotechnology Industry Research Assistance Council, Department of Science & Technology, Department of Biotechnology, AGNII, Office of the Principal Scientific Adviser, and AIM- NITI.
- ❖ This listicle contains details of all the shortlisted solutions by startups for COVID-19 by the Taskforce.

BUBBLE BYTE INDIA

Details Of the Founders	Details Of the Product	Market Status	Support Needed
Name: Amankhan Khajakhan Pathan Website: www.bubblebyteindia.com Location: Maharashtra	Product: Dr. Sanitor Target Audience: Hotels, Government Offices, Police Stations, Hospitals, Banks, Shops, Malls, etc.	Startup Stage: Early Traction Price: INR 500 Production: 500 per day	Deployment: They need deployment support.
<ul style="list-style-type: none"> Hands touch many surfaces and can pick up viruses. The virus can survive for about 72 hours on different surfaces. Sanitizing every possible surface is one of the current devised ways in precautionary measures. What if we can do our daily chores without having to touch anything. The lesser you touch, the safer you are. Even while washing our hands we touch the surfaces of the cleaning agent or water tap, so there are chances of the virus being settled on the surfaces. Dr. Sanitor- A smart mechanical liquid disinfectant dispenser, which dispenses fluid without having to touch the bottle. It uses a pedal mechanism for its operation. Safer and cost-effective precautionary measures. Dr. Sanitor can be installed at public places with sanitizer bottles at toilets, washbasins, colleges, hospitals, etc. Every place where a hand wash is a must. There are two versions of the product portable and fixed place application. 			 <p>Dr. Sanitor the lesser you touch, the safer you are.</p> <p>Do you want to protect yourself from corona virus?</p> <p>Well, we have a solution for you</p> <p>WHAT IS DR. SANITOR?</p> <p>Model 1: For Portable Application</p> <p>Model 2: For Installation at Public Places</p> <p>Connect with us:</p> <ul style="list-style-type: none"> Mr. A. E. Pathan 989044603 Website: www.bubblebyteindia.com Email: 989044603@outlook.com Instagram: @bubblebyteIndia/ WhatsApp: +91989044603 <p>QR Codes:</p> <p>Model 1: A smart mechanical liquid disinfectant dispenser.</p> <p>Model 2: Dispenses hand wash or sanitizer without actually having to touch the bottle.</p> <p>Why to use Dr. Sanitor?</p> <ul style="list-style-type: none"> A safer and cost effective precautionary measure from Covid-19. Prevents your direct contact and even Corona. While washing our hands we touch the surfaces of cleaning agent or water tap, so there are chances of virus being settled on the surfaces. Virus can survive for about 72 hours on different surfaces. So, taking into consideration this basic phenomenon we have devised 'Dr. Sanitor'. <p>Contact today and save your family from this pandemic</p> <p>Address: Bubble Byte India Pvt. Ltd. PERSONNEL PROTECTIVE EQUIPMENT

INDIAN INSTITUTE OF TECHNOLOGY MADRAS

Details Of the Founders	Details Of the Product	Market Status	Support Needed
Name: Prof T Pradeep Website: www.dstuns.iitm.ac.in Location: Chennai	Product: Nasal Drop Technology for Deactivation of Covid-19 Target Audience: Central and State Governments	Startup Stage: Scaling Price: INR 10 Production: 10 MT per day	NA
<ul style="list-style-type: none"> The proposal is for the application of their technology in nasal drop-based deactivation of the COVID-19 virus. They expect a significant decline in the virus infection, especially when the infection has affected the nose and throat. The formulation can also be applied for surface sanitization. They expect the product to be extremely effective for the prevention and treatment of nasal transmission virus infection initiates and progresses through the droplet route and their technology is extremely effective against high virus load in the water medium. This technology has been successfully tested against enteric viruses (such as Rotavirus, Poliovirus, Japanese Encephalitis), bacteria (such as E. Coli, Salmonella, S. Aureus). 			

PERSONNEL PROTECTIVE EQUIPMENT

SHAPEYSQUARE

Details Of the Founders	Details Of the Product	Market Status	Support Needed
Name: Shubham Ahluwalia Website: www.shapeysquare.com	Product: Covid-19 face shields Target Audience: Police department, workers, labor, etc.	Startup Stage: Scaling Price: INR 45 Production: 100 per day	Logistics: They need support in the supply chain movement.
<ul style="list-style-type: none"> • The company is providing 3-D printed Face shields and respirator valves. • It is an extremely low-cost face shield that uses OHP sheets to provide a barrier to the face of the person from being in contact with affected people. • OHP sheets are easily available and they do not need to be disinfected they can replace easily 			

PERSONNEL PROTECTIVE EQUIPMENT

SUNFOX TECHNOLOGIES PRIVATE LIMITED

Details Of the Founders	Details Of the Product	Market Status	Support Needed
Name: Rajat Jain Website: https://sunfox.in	Product: Polycarbonate face shield helmet Target Audience: CMC, Aiims, health department	Startup Stage: Early Traction Price: INR 100 Production: 20,000 per day	Logistics: They need support in the supply chain movement.
<ul style="list-style-type: none"> The startup has developed a polycarbonate face shield helmet. It is one piece, easy to carry, easy to wear, easy to clean, lightweight, and economical protective gear. 			<p>Flat Pattern Face Shield Made from 0.030" Polycarbonate</p> 

PERSONNEL PROTECTIVE EQUIPMENT

SWASTI AGRO AND BIOPRODUCTS PVT LTD

Details Of the Founders	Details Of the Product	Market Status	Support Needed
Name: Abhay Shendye Website: www.swastiagro.com Location: Pune	Product: Coating fabric to make a mask that can adsorb and kill the virus Target Audience: CMC, AIIMS, health department	Startup Stage: Early Traction Price: INR 300 per pack Production: 5,000 per day	Logistics: They need assistance in the transportation of raw material.
<ul style="list-style-type: none"> The company has a patented derivative of chitosan that is proposed to be re-purposed for coating on masks. These masks can adsorb and kill viruses. The derivatives of chitosan are otherwise safe to use and have been deployed in IV injections as well as carriers in the flu vaccine. The proposal is to make a concentrated solution of the derivative, which is stable at room temperature. This can be diluted (75 X) and use to dip any fabric on which the material will get coated. These can be used as low-cost masks. 			

PERSONNEL PROTECTIVE EQUIPMENT

TINKRBOT TECHNOLOGIES

Details Of the Founders	Details Of the Product	Market Status	Support Needed
Name: Ishruthi Website: www.tinkrbot.com Location: Trichy	Product: Face Shields made using 3D Printing Target Audience: Government Hospitals, Police officers, Municipal workers	Startup Stage: Validation Price: INR 200 Production: Printing- 20 per day Moulding- 2,000 per day	NA
<ul style="list-style-type: none"> • The startup has developed face shields made using 3D printing. • The 3D Printed design is flexible, light-weighted, and simple to suit the comfort of doctors using the shield. • Thereby it provides additional protection to doctors dealing with patients. 			

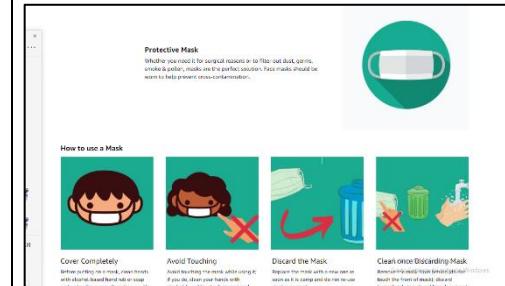

PERSONNEL PROTECTIVE EQUIPMENT

UNEAKO GREEN EARTH PVT. LTD.

Details Of the Founders	Details Of the Product	Market Status	Support Needed
Name: Ankit Tripathi Website: http://uneako.com/ Location: Delhi	Product: SN-19 Face Shield Target Audience: Government Hospitals, Police officers, Municipal workers	Startup Stage: Early Traction Price: INR 70 Production: 200 per day	Logistics: They facing issues procuring raw material
<ul style="list-style-type: none"> SN-19 can help frontline medical responders taking care of the infected person. The ideal solution to avoid touching your face, eyes, mouth, and nose. Ultimately safeguarding you from the transmission of germs or viruses through infected patients. <ul style="list-style-type: none"> Features of the Face Shield: Lightweight and ideal to wear for a long period. The total weight is around 40gm. The minimal volumetric weight which allows easy transportation of face mask in bulk. Adjustable face mask. The person can adjust the face mask as per their face size and shape. Crystal Clear transparent face mask for clear vision. Easy to clean and reusable. SN19 is durable as well. People can use it easily. They feel no difficulty to bend their head or neck while using this face mask. 			

PERSONNEL PROTECTIVE EQUIPMENT

URTECHLIKWORD PRIVATE LIMITED

Details Of the Founders	Details Of the Product	Market Status	Support Needed
Name: Praveen Urmila Website: https://uralstech.in/ Location: Delhi	Product: Masks	Startup Stage: Early Traction Price: INR 40 Production: 10,000 to 15,000 units per day	NA
<ul style="list-style-type: none"> The startup produces a protective mask to filter out dust, germs, smoke & pollen. Appended below are the features of the product suitable for children and adults: <ul style="list-style-type: none"> For various treatment environments such as emergency room, operating theatre, etc Unique invasive and non-invasive ventilation modes to meet the different patients' needs Inspiration halt, convenient for sucking phlegm Oxygen mixing technique to adjust oxygen concentration and meet the oxygen therapy need Alarm and monitoring system which meet the international safety standard TFT screen, displaying various respiration parameters and waveforms With a built-in battery and on-vehicle power connector for A/C and D/C power supply 			 <p>Protective Mask Whether you need it for surgical reasons or to filter out dust, germs, smoke & pollen, masks are the perfect solution. Face masks should be worn to help prevent virus transmission.</p> <p>How to use a Mask</p> <ul style="list-style-type: none"> Cover Completely: Before cycling in a mask, cover both the nose and mouth with a clean, unused mask. Make sure there are no gaps between the mask and your face. Avoid Touching: Avoid touching the mask while wearing it. If you do, clean your hands with a hand sanitizer or soap and water. Discard the Mask: Replace the mask with a new one as soon as it is soiled and do not re-use it. Throw it away in a trash bin. Clean once Discarding Mask: Avoid touching the mask once discarded. Wash your hands with soap and water.

PERSONNEL PROTECTIVE EQUIPMENT

JARIWALA ROBOTICS PRIVATE LIMITED

Details Of the Founders	Details Of the Product	Market Status	Support Needed
Name: Vishal Jariwala Website: www.jgrouprobotics.com	Product: Face Shields Target Audience: Government Hospitals, Corona Testing Centres, Défense, Police, Home Guards & Security Guards working on fields	Startup Stage: Scaling Price: INR 300 Production: 5,000 per day	NA
<ul style="list-style-type: none"> Face shields offer an extra layer of protection for health workers, with space to wear a protective N9-5 mask underneath, and unlike masks, don't need to go through quite the same rigorous testing or meet the same safety standards to be of immediate use, and can be easily cleaned for repeated wear. A 3D printer essentially works by extruding molten plastic through a tiny nozzle that moves around precisely under computer control. It prints one layer, waits for it to dry, and then prints the next layer on top. 			

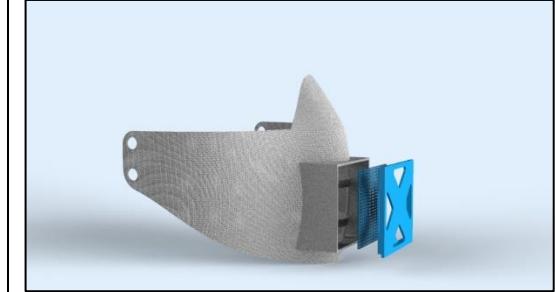

PERSONNEL PROTECTIVE EQUIPMENT

MOM MADE PRODUCTS

Details Of the Founders	Details Of the Product	Market Status	Support Needed
Name: Karan Garg	Product: Home Made Face Masks Cotton Target Audience: Medical Stores, Administration, etc	Startup Stage: Scaling Price: INR 20 Production: 10,000 per day	Funding
<ul style="list-style-type: none"> Most masks available are one-time use and hence unaffordable for masses. Mom Made Products' home-made cotton face masks are reusable, washable protective masks that can be used for masks. At the same time, these are manufactured by women SHGs thereby earning them a supplemental income in these tough times. 			

PERSONNEL PROTECTIVE EQUIPMENT

MGH LABS PVT LTD

Details Of the Founders	Details Of the Product	Market Status	Support Needed
Name: Gokul Rajendran Website: http://bogorchid.com/ Location: Chennai	Product: Filter based air filtration Target Audience: Hospitals staff, Health care workers, Frontline doctors, and common public	Startup Stage: Validation Price: INR 200 Production: 1,000 units	NA
<ul style="list-style-type: none"> • The Filter based wellness mask protects a healthy person from an infected person (& vice versa) by providing an effective physical barrier from aerosol-based virus contraction. • It provides a protective mask for health care workers, physicians, and the common public. • It effectively filters germs including bacteria, fungus, and dust particles like pollen, etc. • It acts as a wellness tool by providing preventive health solutions. • It provides smart filtration and protection at an affordable price. Indigenously manufactured with highly sterile conditions 			

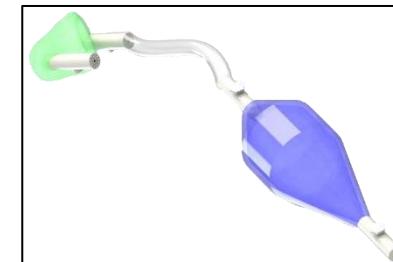

PERSONNEL PROTECTIVE EQUIPMENT

VIEBEL CONCEPTS PLC

Details Of the Founders	Details Of the Product	Market Status	Support Needed
Name: Mithun Website: http://www.viableconcepts.in Location: Mysuru	Product: Automated Integrated Hand Wash Station Target Audience: Hospitals and Health Care, Airports, Domestic Use, Schools and Educational Institutions, etc.	Startup Stage: Validation Price: INR 3,000 Production: 1,000 units	NA
<ul style="list-style-type: none"> Integrated Hand wash liquid and water dispensing station. Applicable at places of hand wash and washbasins: Sensor-based Tap and Electronic Box. The device could be mounted on any existing washbasins or new washing stations can be manufactured. Operations are sensor-based. This suffices hand washing for containment of COVID-19 virus and importantly avoids the spread of the virus through touching of the tap lever or knob by multiple users. It's a non-contact Hand Washing Station with Water and Handwashing liquid dispersion at the same point at prescribed frequencies. 			

PERSONNEL PROTECTIVE EQUIPMENT

PILTOVERTECH

Details Of the Founders	Details Of the Product	Market Status	Support Needed
Name: Manan Issar Website: https://idahand.in/ Location: Jaipur	Product: Bi-Directional One-Way Valve, Venturi Splitter, Headbands for masks and Bolstered Face Shields Target Audience: Hospitals, Govt. Offices, Police	Startup Stage: Validation Price: Face Shield - 375, Valve - 350, Splitter - 350, Headband – 100 Production: 1,000 per day	NA
<ul style="list-style-type: none"> • Bi-Directional One-Way Valve – Unlike the reusable valves (used in Ambu bags - hand-held devices used hospitals run out of ventilators or during emergencies) their bi-directional one-way valves are modular. • Venturi Splitter - Present splitters compromise with the air pressure as the air splits at the junction of the splitter. • Headbands – Improved headbands designed for the front line make masks tolerable for longer periods. They have re-designed the headband to assume the form of a comb so that it does not slip down the back of the head. • Bolstered Face Shield - Present designs leave the bottom end of the acrylic shield to wobble; they have re-designed the face shield to have additional support at the bottom. 			

PERSONNEL PROTECTIVE EQUIPMENT

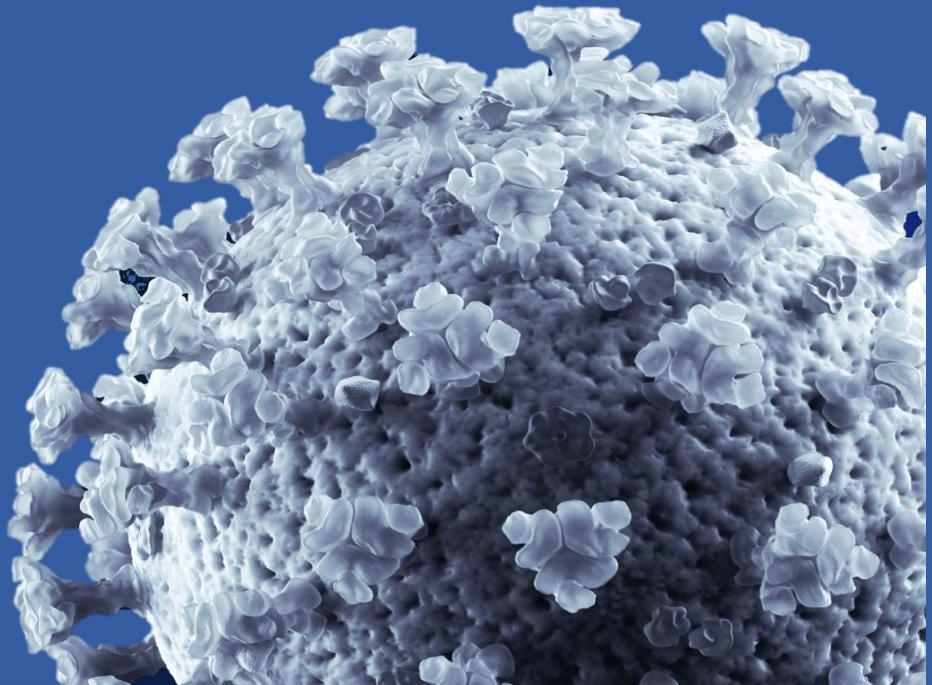

PUPILMESH PRIVATE LIMITED

Details Of the Founders	Details Of the Product	Market Status	Support Needed
Name: Milind M Manoj Website: http://www.pupilmesh.com Location: Bangalore	Product: Low-Cost Face Shields Target Audience: Bangalore Medical College, MS Ramaiah Medical College	Startup Stage: Prototype Price: INR 85 per unit Production: 10,000 per day	Deployment: They need financial support.
<ul style="list-style-type: none"> The startup has developed low-cost face shields. The face shield has got anti-scratch and anti-fogging capabilities and thus makes it easy and comfortable to use. 			 <p>3D printed Face Shield weight: approx 17gms easy to fabricate and deploy. Provides complete protection to the face</p>

TESTING EQUIPMENT

TESTING EQUIPMENT

AYU DEVICES PVT LTD

Details Of the Founders	Details Of the Product	Market Status	Support Needed
Name: Adarsha K Website: www.ayudevices.com Location: Maharashtra	Product: Digital Stethoscope for COVID-19 Target Audience: Hospitals	Startup Stage: Early Traction Price: INR 16,000 Production: 10 units per day	Logistical Support: Need assistance for movement in the supply chain Funding: It needs financial support of INR 60-80 lakhs
<ul style="list-style-type: none"> • AyuSynk's unique stethoscope design allows healthcare workers to perform auscultation while being protected in an isolation environment and can be used with protective covers in the ED to reduce contamination when pre-screening admissions. • AyuSynk can be used directly using earbuds or headphones, via Bluetooth within the isolation room or to a consultant outside the room or send sounds via email or instant messaging. • The company has sold 1,000 units sold and deployed in many hospitals. 			 <p>AUSCULTATION FOR COVID-19 PATIENTS USING AYU DEVICES MODULES</p> <p>Setup inside the protective suit External Appearance Wired Version for maintaining distance from the patient</p>

TESTING EQUIPMENT

BLACKFROG TECHNOLOGIES PRIVATE LIMITED

Details Of the Founders	Details Of the Product	Market Status	Support Needed
Name: Mayur U Shetty Website: www.ayudevices.com Location: Maharashtra	Product: Emvolio Target Audience: Hospitals, Care centers, labs, etc.	Startup Stage: Validation Price: INR 26,000 Production: 4 units per day	NA
<ul style="list-style-type: none"> Previously developed a portable precision-refrigeration system for transport of blood, serums, vaccines, etc. Now leveraging this technology for transport of Covid-19 samples Now, they are leveraging this technology for transport of COVID-19 samples. They have developed a safe and controlled platform for the transport of nasal/throat swabs from collection centers/hospitals to the certified testing centers for improving accuracy in testing and minimizing false negatives (Arising from thermal degradation of viral specimens). 			

TESTING EQUIPMENT

CANDIPHI HEALTHCARE PRIVATE LIMITED

Details Of the Founders	Details Of the Product	Market Status	Support Needed
Name: Ryan Lemos Website: www.candiphi.com Location: Bangalore	Product: Candiphi m-health screening and telemedicine platform Target Audience: Corporate companies, residential segment, etc.	Startup Stage: Validation Price: INR 3,75,000	NA
<ul style="list-style-type: none"> • Candiphi is a healthcare technology company and its m-health screening platform for non-communicable diseases is perfect for tackling the Covid-19 crisis. • Screening tests are conducted with the help of a Clinic-In-A-Bag (CIAB) product integrated with the Candiphi software platform. • They do a wide variety of tests, the tests applicable for Covid-19 are the body temperature, SpO2, cardiology, and lung function tests. • The body temperature tests are conducted with an infra-red thermometer, SpO2 with a finger cuff device, lung function with a Bluetooth peak flow device and ECG, auscultation, and cardiac function with a handheld, wireless, Bluetooth 3-lead device. 			

TESTING EQUIPMENT

TURTLE SHELL TECHNOLOGIES PVT LTD

Details Of the Founders	Details Of the Product	Market Status	Support Needed
Name: Mudit Dandwate Location: Bangalore	Product: Dozee Target Audience: Quarantine Centres/Isolation Centres, Hospital wards, etc.	Startup Stage: Early Traction Price: INR 7,500 Production: 1,000 units per day	Deployment: It needs assistance in the deployment of the product Manufacturing assistance Funding
<ul style="list-style-type: none"> Dozee is a CE Marked contact-free health monitor with clinical-grade accuracy with remote access and MEWS based alert mechanism. The system continuously monitors a person's heart rate, respiration rate placed under the mattress, converting any bed into a step-down ICU without any cuffs or leads. It also connects to other Bluetooth based peripherals like SPO2 & BP Monitor to provide access to more vitals remotely. In the COVID-19 scenario, Dozee is playing a crucial part in continuous and proactive monitoring of asymptomatic and mildly symptomatic patients in isolation wards and quarantine. It is also helping in monitoring at-risk patients at home and enabling doctors to continuously monitor their health. AI-based alerts are helping medical fraternity take timely actions. This has already proven life-saving in 40+ cases, helping flag cases of pneumonia, tuberculosis, heart failure early. 			

TESTING EQUIPMENT

FIVIDO TECHNOLOGIES PRIVATE LIMITED

Details Of the Founders	Details Of the Product	Market Status	Support Needed
Name: Gaurang Kuchhal Website: http://www.fivido.com/ Location: Delhi	Product: Infrared Thermometer Target Audience: Government, Railways, Airports, Private Institutions, etc.	Startup Stage: Early Traction Price: INR 2,000 Production: 5,000 units per day	Logistics: It needs assistance in procuring raw material.
<ul style="list-style-type: none"> • Infrared thermometers are needed to check a person's body temperature without any contact with the person in less than 1 second. • Currently, IR thermometers are exhausted in the worldwide market due to heavy demand and limited supply. • The startup is looking to manufacture this thermometer in a house in India. 			

TESTING EQUIPMENT

THERMAL ENERGY SERVICE SOLUTIONS PRIVATE LIMITED

Details Of the Founders	Details Of the Product	Market Status	Support Needed
Name: Rajat Gupta Website: www.tessol.in/	Product: Phase Change Materials technology Target Audience: Fleet owners/logistics companies, Diagnostics labs	Startup Stage: Validation Price: INR 3,500 Production: 1,000 units for PCM Cartidges + 100 bags per day	NA
<ul style="list-style-type: none"> The company has developed an ESSOLs diagnostics cold chain solution that is reusable and maintains the temperature in the desired range for 10+ hours with multiple openings. It shall help in the transportation of COVID-19 samples from the site of collection to the labs in 2-8 Degree Celsius. 			

TESTING EQUIPMENT

THORI INDIA (OPC) PRIVATE LIMITED

Details Of the Founders	Details Of the Product	Market Status	Support Needed
Name: Omkar Walambe Website: www.gasmeter.org.in/enquiry/	Product: The Flow Frequency Detector Target Audience: Fleet owners / logistics companies, Diagnostics labs	Startup Stage: Scaling Price: INR 3,000 Production: 5,000 units per day	NA
<ul style="list-style-type: none"> • The proposal of the Flow Frequency Detector intends to measure flow frequency & detect the respiration capacity of individuals. • The technology intends to measure the breathing power of the body to detect the virus body's most not immune to such as COVID-19 • The severe acute respiratory syndromes and Diagnose the healthiness Of Patient/Testee. 			

TESTING EQUIPMENT

URAV ADVANCED LEARNING SYSTEMS PRIVATE LIMITED

Details Of the Founders	Details Of the Product	Market Status	Support Needed
Name: Ravi Kumar Website: https://uralstech.in/ Location: Kerala	Product: Non-Contact IR Thermometer Target Audience: Individuals, Schools, Colleges, Government	Startup Stage: Early Traction Price: INR 4,130 Production: 30 units	NA
<ul style="list-style-type: none"> The company wants to make DIY kits where the person can assemble and learn the working of the product. For example, a Non-contact thermometer is necessary for a situation like the pandemic now. At the same time due to the lockdown, children do not have an opportunity to spend their time in a worthwhile manner. So, the startup has created a thermometer where children will assemble the thermometer using their video tutorial and get the finished working product at the same time learn about electronics. 			

TESTING EQUIPMENT

MEDIOTEK HEALTH SYSTEMS PRIVATE LIMITED

Details Of the Founders	Details Of the Product	Market Status	Support Needed
Name: Sharmila Devadoss Website: http://www.vincense.com Location: Chennai	Product: COVID-19 risk mitigation & management using clinical-grade wireless health screening/monitoring system Target Audience: Hospitals Corporate Office Manufacturing Plant etc.	Startup Stage: Validation Price: 15,000 to 27,000 per unit Production: 3,300 units per day	NA
<ul style="list-style-type: none"> • VinCense Digital Health Screening/Monitoring Internet of Medical Things (IoMT) Platform (patent pending) built around India's first clinical-grade wearable with detachable straps can measure pulse rate, oxygen saturation, respiratory rate, and skin temperature in just 10 seconds and is the perfect triage tool for active surveillance. • VinCense COVID-19 Risk Detection Protocol (VinCRDP) based on Dept. of Public Health, Govt of Tamil Nadu, and WHO guidelines enable cost & time-effective triage of at-risk individuals leading to targeted screening for COVID-19 in a data-driven manner. Public health officials and healthcare professionals have access to live actionable data and can make quick decisions to save lives.

BRIOTA IVS

Details Of the Founders	Details Of the Product	Market Status	Support Needed
Name: Gautham Pasupuleti Website: www.briota.co Location: Pune	Product: Briota Portable Ventilator Target Audience: State Governments	Startup Stage: Validation Price: INR 15,000 Production: 100 units per day	NA
<ul style="list-style-type: none"> Briota has developed India's first CDSCO Approved digital handheld Spirometer Kit with Mobile Software for Asthma and COPD Patients. With the current Covid-19 crisis - they are redesigning our Spirometer to be used in a portable Ventilator. Briota's CDSCO certified Spirometer and related mobile app and software can be quickly redesigned into a low-cost portable ventilator system which will help the medical professional to first measure Covid-19 patient's lung capacity and then provide required ventilation support as needed. They can get the working prototype ready within a week and then with the help of companies like Bajaj Electricals - manufacture 100s of ventilators per day.

RAYIOT SOLUTIONS PVT. LTD

Details Of the Founders	Details Of the Product	Market Status	Support Needed
Name: Ranjana Nair Website: http://www.raybaby.us Location: Bangalore	Product: Respiration Monitor (mini ICU) Target Audience: Government Taskforces and Quarantine Facilities	Startup Stage: Validation Price: INR 19,900 per unit Production: 5,000 per unit	NA
<ul style="list-style-type: none"> What it does: Acts like mini ICU units that can intelligently manage quarantined spaces by tracking respiratory rate (early indicator for SARS or CoVI). Using AI, quarantined patients can be categorized on risk and admitted to ICU. Important Feature: Uses AI algorithm and sensor hardware to track breathing and predict health events (including fever and CoVID symptoms). Where to use: Quarantine facilities. Any space can be converted into a mini ICU space with this product. A central database to track who is getting worse in Quarantine and who is getting better in quarantine. Also enforces quarantine which is the need of the hour. Why it's important: Non-contact, non-invasive, reusable, affordable mini ICU units with minimal clinic setting. Also reduces inflow into hospitals and reduces the burden on healthcare professionals.

<ul style="list-style-type: none"> The “Treatment Response Assessment & Predictions” (TRAP) powered by rises.AI platform, acts as an assistant for medical professionals. It brings in intermediate expertise for timely indicative diagnosis and precision efficiency at a scale to reduce pressure on the system. It facilitates instantaneous indicative diagnosis, in chronic and critical care. The specialized algorithms, analyses radiology imaging data like X Rays, CT Scans & MRIs, and build correlations with patient data including various pathology tests. In the case of large volumes, Rises categorizes the studies into normal & abnormal and provides classification per abnormality. The technology is extended and calibrated to specific viral pneumonia in general and COVID-19 in specific. It tracks patients' progress during subsequent visits to generate automated assessment patient response and disease progression. The differential analysis provided by Rises TRAP provides a crucial impetus for predictive prognosis management and personalized treatment.

AMOUR LAB PRIVATE LIMITED

Details Of the Founders	Details Of the Product	Market Status	Support Needed
Name: Salonee Patro Website: amourlab.github.io/ Location: Odisha	Product: Artificial intelligence and web development Target Audience: Health care lab, hospitals, B2B, and B2C	Startup Stage: Validation Price: INR 250 for 6 months	NA
<ul style="list-style-type: none"> The startup is trying to develop a web application which will help people and suggest them to consult a doctor as per the symptoms it shows, keeping WHO's guidelines in mind this application has been developed to help the public as well as doctors from rushing into check-up without symptoms and giving a fair chance to the actual patients. As to have control over this pandemic situation a web application has been developed driven by AI platforms for helping doctors, common people as a whole. A set of questions will be asked one leading to the next and in the end, it will show what are the chances of you having COVID-19. If there are chances of this virus within you then it will show you suggestions of doctors near you for check-up otherwise you are good to go. By this, there will be comparatively less rush in the hospitals for a check-up by allowing the affected patients to be treated sooner. 			

MOVEMENT TRACKING

HEAMAC HEALTHCARE PVT. LTD

Details Of the Founders	Details Of the Product	Market Status	Support Needed
Name: Prasad Muddam Website: www.heamac.com Location: Hyderabad	Product: CoWatch Target Audience: All masses	Startup Stage: Early Traction Price: INR 1,000	Funding: 90 lakhs
<ul style="list-style-type: none"> The startups have developed a tracking wristband called CoWatch The key features of the device are Prevention, monitoring, tracking, and alerting. It detects the suspects with the symptoms of COVID-19 by monitoring their vital parameters. It also helps the doctors and healthcare workers to monitor the health conditions of the quarantined patients and also of the self quarantined people to take immediate action. The mobile application also enables the user to track and monitor the vitals of multiple persons enabling them to track the condition of their kids and family. It acts as a first stage of screening for the doctors and makes sure that the healthcare workers working for the safety of other people are safe. It also makes sure that there is no emergency or loss of life due to the lack of monitoring. It alerts the user with the nearby hotspots areas and corona patients. It motivates people to follow social distancing by giving individual reward points for maintaining social distancing and also alerts them if they are close to any others. 			

MOVEMENT TRACKING

HW DESIGN LABS OPC PRIVATE LIMITED

Details Of the Founders	Details Of the Product	Market Status	Support Needed
Name: Jayakrishnan A L Website: www.hwdesignlabs.com Location: Kerala	Product: accuTRAK Target Audience: Hospitals and Enterprises	Startup Stage: Validation Price: INR 1,50,000 Production: 500 to 1,000 units per day	NA
<ul style="list-style-type: none"> The proposed solution against the problem statement 'Movement Tracking' is the most advanced technology currently used in developed countries. Compared to existing technologies using Bluetooth, GPS, WiFi, etc, the proposed solution is more effective and designed to track in mind. These are futuristic and to be highly valued from import substitution points of view. Ministry of Health strongly recommends for Social Distancing of at least 1 meter or more, hence the solution to track the movement needs to be with an accuracy of minimum 1 m or better. The proposed solution is an accurate indoor positioning system with centimeter-level accuracy. This is highly recommended considering the minimum social distancing need to be at least 1m from person to person.

Name: Akshay Sood Website: https://sarjanindustries.com/ Location: Gujrat	Product: Swachhta Picker Target Audience: Major buyers include Urban Local Bodies (Municipalities), Panchayati Raj Institutions /Rural development departments, etc	Startup Stage: Validation Price: INR 2,850 per piece Production: 150 per day	NA
<ul style="list-style-type: none"> Swachhta Picker is a manually operated handheld equipment that helps to pick up all kinds of solid and semi-solid waste from a distance without much need to bend or physically touch the waste. It, therefore, eliminates the need for direct contact with waste and hence minimizes many kinds of health and safety risks for the sanitation workers. In context to COVID-19, it has a significant role to protect the sanitation workers from the transmission of COVID-19 through contaminated waste. The use of swachhta picker will add another barrier to such transmission by physical distancing of waste from sanitation workers and would protect them to get infected. Moreover, the equipment is not just for corona, it would be used for the long term to save the workers from a lot of other health and safety risks on account of their job.
